

I am Manufacturer	I'm trying to Produce more amount of wind energy	But Don't know where to place the windmills	Because no analysis of the weather conditions	Which makes me feel concerned
I am A customer	I'm trying to Should have no power cuts and reliable energy	But I don't know whether wind energy is effective	Because no knowledge about the wind patterns in my region	Which makes me feel worried
I am organisation	I'm trying to production of wind energy	But I face overproduction and high cost issues	Because accurately can't able to predict the wind energy	Which makes me feel sad
